- D40^{1,2}
- D40X^{1,2}
- D60^{1,2}
- D80^{1,2}
- D90¹
- D200^{1,2}
- D300
- D300S
- D3
- D3X
- D3S
- D4
- D4S
- D5
- D500
- D5000¹
- D5100
- D5200
- D5300
- D5500
- D600
- D610
- D700
- D750
- D7000
- D7100
- D7200
- D7500
- D800
- D800E
- D810
- D810A
- Df

¹When installed on Windows the Compatibility Mode must be set to Windows Vista Service Pack 2.

²These models are not supported on Mac El Capitan (OSX 10.11) and newer OSX releases.

Enhancements

- Added Support for D5 Firmware Update 2.

Bugs Fixed

- Corrected intermittent crashes with D5, D500, and D7500.

Known Issues

- Properties window does not display the Sensitivity (ISO) value when settings are not numeric values (i.e. Lo-1, Hi-1, etc.).
- On Mac computers the program may hang if Adobe Bridge is running at the same time as CameraRC Deluxe.

End Of Life Notification

- Windows Vista is no longer officially supported.
- Mac OS 10.8 (Mountain Lion) is no longer officially supported.

Program Limitations

- Only one camera can be connected and in use by the program on a single computer.
- Hot switching between camera models (i.e., Changing cameras while the program is running) is not allowed.
- Program cannot be installed onto a network share - can only be installed on a local disk drive.
- Images captured that are not focused in contrast mode live view (i.e., focus indicator not green) will incorrectly display the last phase detect focus point instead of displaying no focus point. The focus points are also incorrectly shown in Nikon Software as they are incorrectly stored in the image by the camera. The degree of this error varies depending on camera model.
- If there are a large number of images (100's) on the memory card installed in the camera it can take a minute or longer for the program to initialize.

System Requirements

- Windows 7 or later
- Mac OSX 10.9 - 10.12
- 2 Gbyte of RAM
- 50 Mbyte free disk space
- Recommended screen resolution 1024 X 768 - lower resolutions supported with scaling.
