

# CameraRC Deluxe Edition 1.1.25 - Release Notes

CameraRC Deluxe Edition provides tethering support for the below listed Nikon cameras.

## **Nikon Cameras Supported**

- D40<sup>1</sup>
- D40X<sup>1</sup>
- D60<sup>1</sup>
- D80<sup>1</sup>
- D90<sup>1</sup>
- D200<sup>1</sup>
- D300
- D300S
- D3
- D3X
- D3S
- D4
- D4S
- D5000<sup>1</sup>
- D5100
- D5200
- D5300
- D5500<sup>2</sup>
- D600
- D610
- D700
- D750
- D7000
- D7100
- D7200<sup>2</sup>
- D800
- D800E
- D810
- D810A<sup>2</sup>
- Df

<sup>1</sup> When installed on Windows 7 or later the Compatibility Mode must be set to Windows Vista Service Pack 2.

<sup>2</sup> Native Mac version does not currently support D5500, D7200, D810A.

## **Enhancements**

- Improved Interval Shooting to allow shots at 1 second intervals (requires saving image to camera).
- Don't show "Save on Capture" warning with intervals when saving to camera or camera + computer.

## **Bugs Fixed**

- When shooting intervals time to next shot was inaccurate.

- Program does not change to the Standard Interface Style when selected.
- Program Aborting on Windows 10 systems that are using DirectX 12.
- Program Aborting when memory card is full.

## **Known Issues**

- Mac OSX 10.11 (El Capitan) is not supported - see [News Item](#) for more details.
- Nikon D5500, D7200, and D810A are not currently supported on Mac.
- Images captured that are not focused in contrast mode live view (i.e., focus indicator not green) will incorrectly display the last phase detect focus point instead of displaying no focus point. The focus points are also incorrectly shown in Nikon Software as they are incorrectly stored in the image by the camera. The degree of this error varies depending on camera model.
- If there are a large number of images (100's) on the memory card installed in the camera it can take several minutes for the program to initialize.

## **Program Limitations**

- Only one camera can be connected and in use by the program on a single computer.
- Hot switching between camera models (i.e, Changing cameras while the program is running) is not allowed.
- Program cannot be installed onto a network share - can only be installed on a local disk drive.

## **System Requirements**

- Windows Vista or later
- Mac OSX 10.7 - 10.10
- 2 Gbyte of RAM
- 50 Mbyte free disk space
- Recommended screen resolution 1024 X 768 - lower resolutions supported with scaling.
