- D200<sup>1,2</sup>
- D300
- D300S
- D3
- D3X
- D3S
- D4
- D4S
- D5000<sup>1</sup>
- D5100
- D5200
- D5300
- D5500
- D600
- D610
- D700
- D750
- D7000
- D7100
- D7200
- D800
- D800E
- D810
- D810A
- Df

<sup>1</sup> When installed on Windows 7 or later the Compatibility Mode must be set to Windows Vista Service Pack 2.

<sup>2</sup> These models are not supported on Mac El Capitan (OSX 10.11) and newer releases.

## **Enhancements**

- Added support for Auto ISO Shutter Compensation control.

## **Bugs Fixed**

- Corrected issue with capture hanging under the following conditions: Exposure time longer than 20 seconds, and capturing RAW+JPEG, and shooting intervals.
- Live View image panning not moving image correctly when Auto Image Rotation is off and Image is manually rotated.

- Camera control becomes unresponsive if the start of Live View fails due to an invalid control setting.
- Intermittent crash when closing Live View or when capturing image in Live View.
- Mac only issue - program becomes inoperative after first usage due to issues with program restart information.

## **Known Issues**

## **Program Limitations**

- On Mac the program must be restarted when a camera is disconnected or turned off while the program is running.
- Only one camera can be connected and in use by the program on a single computer.
- Hot switching between camera models (i.e, Changing cameras while the program is running) is not allowed.
- Program cannot be installed onto a network share - can only be installed on a local disk drive.
- Images captured that are not focused in contrast mode live view (i.e., focus indicator not green) will incorrectly display the last phase detect focus point instead of displaying no focus point. The focus points are also incorrectly shown in Nikon Software as they are incorrectly stored in the image by the camera. The degree of this error varies depending on camera model.
- If there are a large number of images (100's) on the memory card installed in the camera it can take several minutes for the program to initialize.

## **System Requirements**

- Windows Vista or later
- Mac OSX 10.8 - 10.10
- 2 Gbyte of RAM
- 50 Mbyte free disk space
- Recommended screen resolution 1024 X 768 - lower resolutions supported with scaling.
